### OnePress introduces Compact 5-in-One Ironing System

Oshkosh, Wis.— OnePress recently added the Compact 5-in-One Ironing System to its comprehensive ironer line-up. This new space-saving ironer/folder processes up to 50 feet of linen per minute. Available in 24- and 32-inch diameters, 102- and 130-inch finishing widths, the Compact works seamlessly with an optional feeder, stacker and small-piece accumulator to quickly accomplish feeding, ironing, folding, stacking and accumulating. Each model is available in either natural gas or steam.

While the 24-inch delivers ironing, primary folding, cross folding and stacking, the 32-inch offers improved versatility for high-volume laundries that require quality results from a compact machine with a small footprint. The Compact 5-in-One supports linen handling and ironing needs for facilities that can't accommodate traditional ironing/folding systems, including hotels and resorts.

Featuring an on-table vacuum that aids linen feeding, the Compact 5-in-One Ironing System offers one, two, or four working lanes, with one lane for sheets, two for table linens and four for small items, including napkins and pillow cases. Each fold is performed using jets of air and reversible conveyors. A simple push of a button by the operator automatically rejects stained or torn items, and a wide, inclined feeding table provides the operator a better view of items while feeding. When the optional folder and stacker are teamed with the Compact, it feeds, irons, folds and stacks while maintaining speeds up to 50-feet-per-minute. All of this requires just one operator.

The Compact 5-in-One offers a unique, all-in-one design that brings automation to small spaces. Equipped with an intuitive control offering 20 pre-set and 20 customizable programs, the Compact provides touch-screen control over ironing parameters, faults, alarms or alterations in processing and diagnostics.

A highly efficient machine, the Compact 5-in-One Ironing System maintains three temperature zones within the roll, always ensuring roll temperature is properly regulated for consistent heat and improved efficiency. These modulating heat zones deliver up to a 30 percent energy savings.

Other perks include a Nomax covered roll for improved ironing quality; a bypass option allowing goods to exit the front or rear of the machine; left or right orientation; processing speeds reaching 50-feet-per-minute; and a self-cleaning exhaust fan.

Built for longevity, the Compact 5-in-One Ironing System is backed by an industry-leading 7/5/3-year limited OnePressCare™ warranty. To find out more about OnePress laundry products, visit [www.onepressironer.com](http://www.onepressironer.com) or call 800-256-1073.

OnePress is a brand of Continental Girbau, Inc., the largest of 11 subsidiaries of the Girbau Group, based in Vic, Spain. Girbau laundry products – marketed throughout 90 countries worldwide – meet rigorous environmental and safety standards established by the International Organization for Standardization (ISO). Girbau S.A. holds both ISO9001 and ISO14001 certifications. Ever focused on laundry efficiency, Continental Girbau is a member of the U.S. Green Building Council (USGB), a 501(c)(3) nonprofit that developed the Leadership in Energy and Environmental Design (LEED) Green Building Rating System.
